Amendment
Attorney Docket No. S63.2R-10308-US01

Amendments To The Specification:

In the first paragraph on page 5, beginning at line 8, please change the following:

In at least one embodiment of the invention a scaffold equipped primary stent body may be expanded and delivered via a unique inflation member or balloon having a unique geometry. When inflated to expand the primary stent, the geometry of the balloon is characterized by a bulge region that allows the scaffold portion to be expanded prior to or subsequent to the expansion of the rest of primary stent body. In at least one embodiment the bulge region is defined as a thicker or thinner portion balloon wall.
